

FEDERAZIONE ITALIANA
DI ATLETICA LEGGERA

LA PALESTRA DELL'ATLETICA
PROGETTO DI UN IMPIANTO POLIVALENTE INDOOR MODULARE

Aelle&P engineering s.r.l.

Prof. Arch. R. Mennella - Ing. Angelo Lalli - Ing. Y.J. Risi

Settore Impianti Sportivi F.I.D.A.L.

Geom. G. Renzulli - Geom. G. Mori Ubaldini

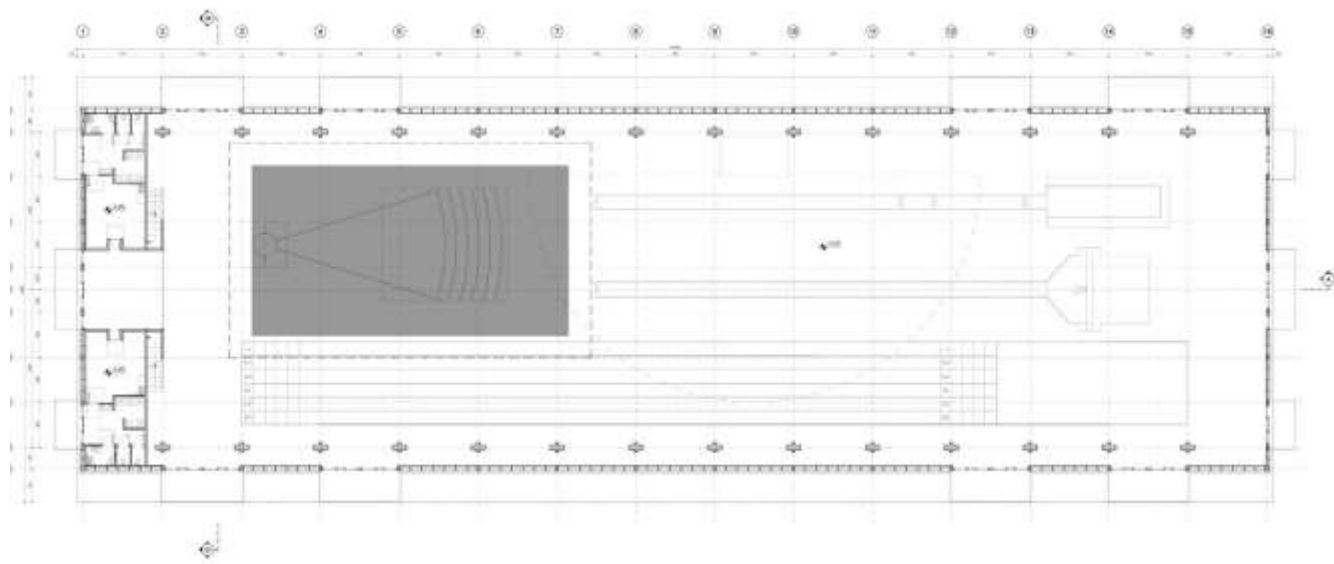

le ragioni della scelta Federale

- *stimolare una reazione progettuale per l'impiantistica dell'atletica leggera, partendo dalle criticità degli indoor;*
- *dare una risposta alle esigenze tecniche dell'atletica invernale;*
- *aiutare le Amministrazioni e le Società proponendo un nuovo modello tipologico;*
- *proporre, alle Amministrazioni e all'intero movimento, un approccio manageriale e imprenditoriale, adeguato ai tempi nuovi, per sviluppare l'atletica leggera.*

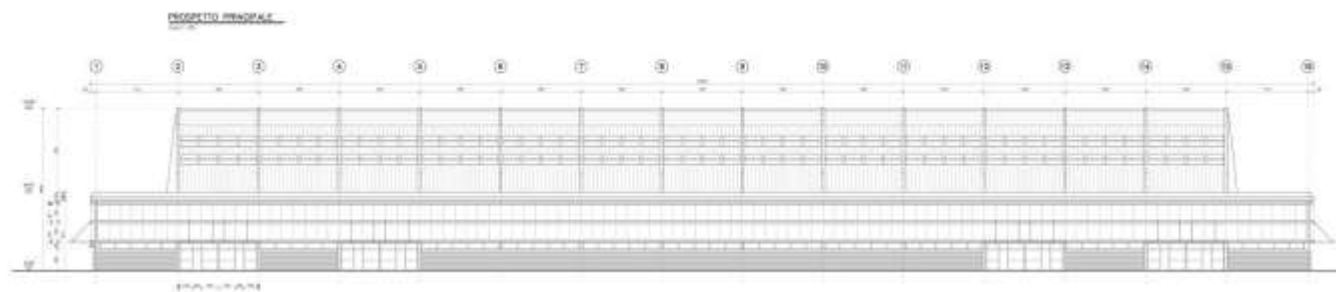

in-put per i progettisti e per la Struttura Impiantistica Federale

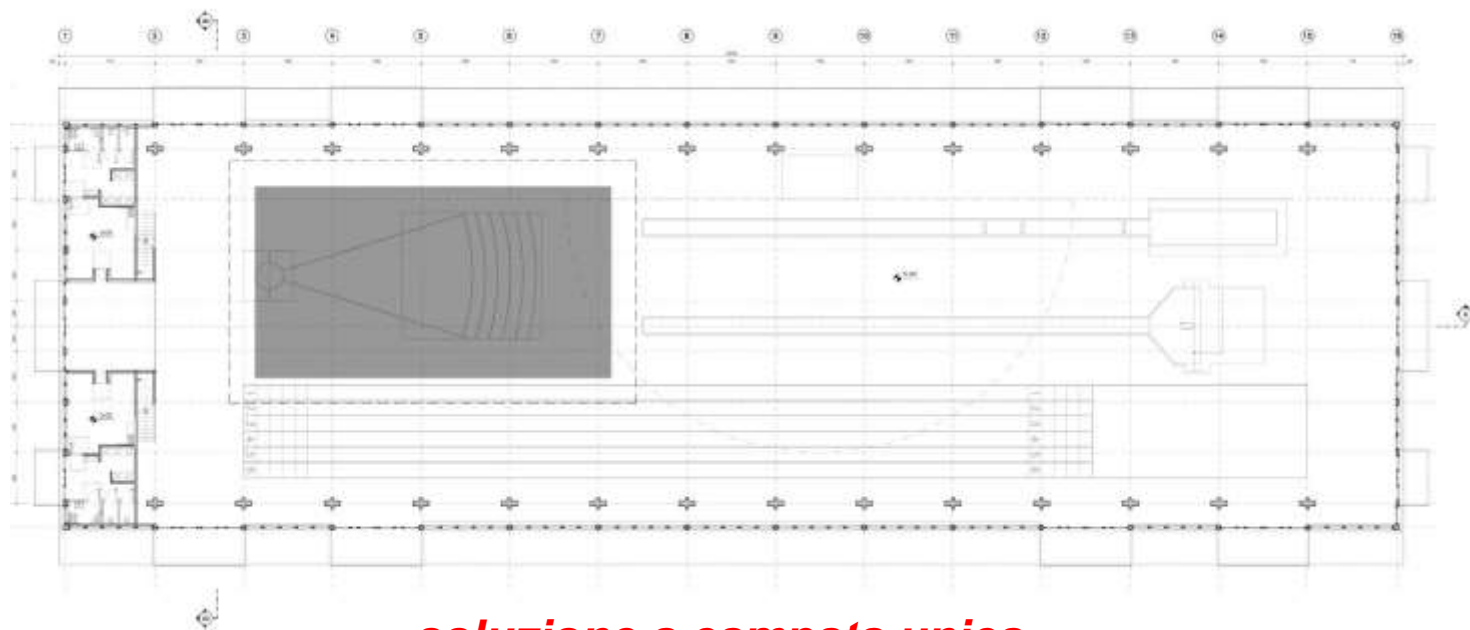

- *eliminare l'eccesso di specializzazione impiantistica in favore di più attuali contesti impiantistici polifunzionali;*
- *proporre un modello impiantistico modulare e modulabile ;*
- *proporre un modello impiantistico capace di soddisfare le esigenze di Società e Tesserati anche per fidelizzare rapidamente nuovi "frequentatori";*
- *proporre un modello gestionale innovativo, polifunzionale, polivalente in grado di offrire servizi differenziati anche per attrarre nuovi clienti/frequentatori;*
- *proporre un luogo in grado di aggregare e di stimolare un nuovo linguaggio ed una nuova identità della disciplina;*
- *sviluppare la progettazione esecutiva del modulo strutturale che con lo strumento finanziario dell'ICS potrà essere offerto dalla FIDAL a quanti, soggetti pubblici o privati, vorranno realizzare questa Palestra indoor per l'Atletica Leggera;*
- *utilizzare il legno lamellare, ove sarà conveniente, in ragione di accordi tra la FIDAL e la Federlegno.*

File	HOML-PA 2-6T.08.08

The architectural drawing shows a large rectangular hall, likely a sports arena or auditorium, with a central stage area. The stage is a large, dark rectangular area with a semi-circular proscenium. The seating area is divided into several sections, with a central aisle and side aisles. The drawing includes a detailed section view on the right side, showing the structural elements and seating arrangement. The section view is labeled 'SEZIONE A-A' and shows the cross-section of the hall, including the stage, seating, and structural elements. The drawing is a technical architectural plan, showing the layout of the building and its various components.

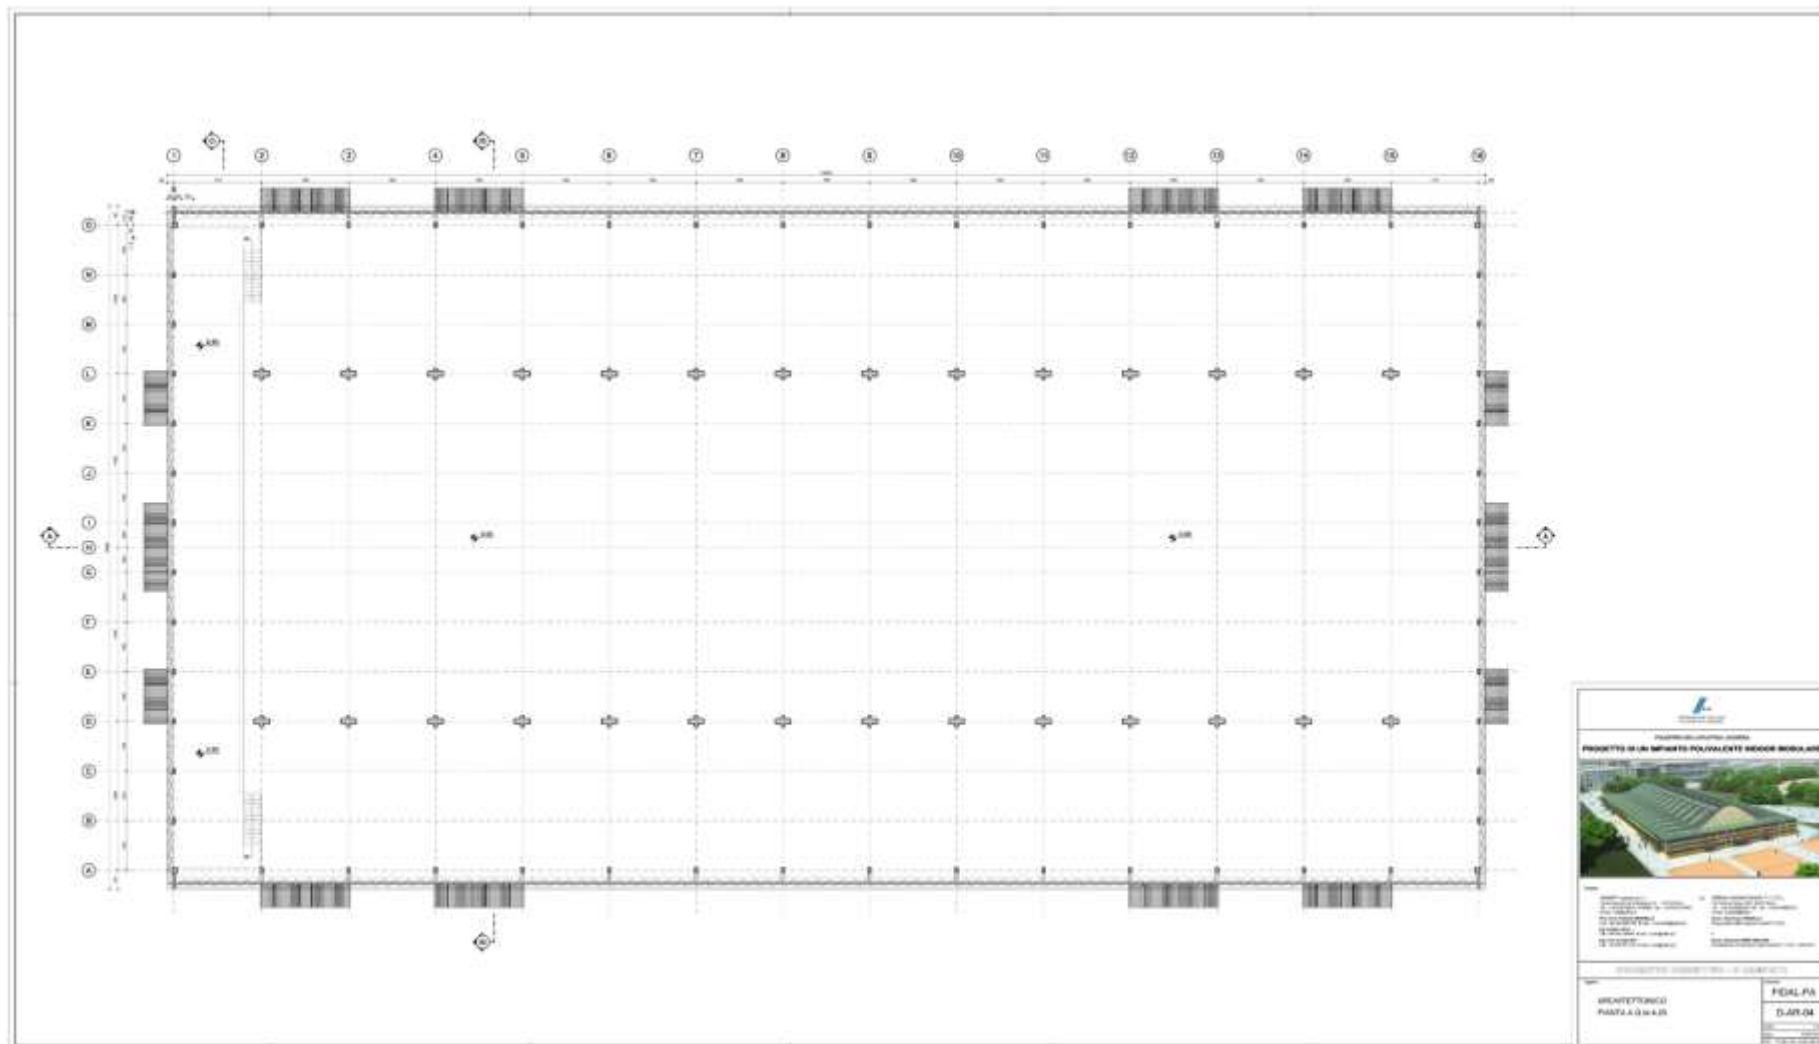

ADACO DELLE NARRATIVE

Figure 1 consists of four sub-diagrams labeled (a), (b), (c), and (d), each showing a column of height h and length l with different boundary conditions and effective lengths l_e .

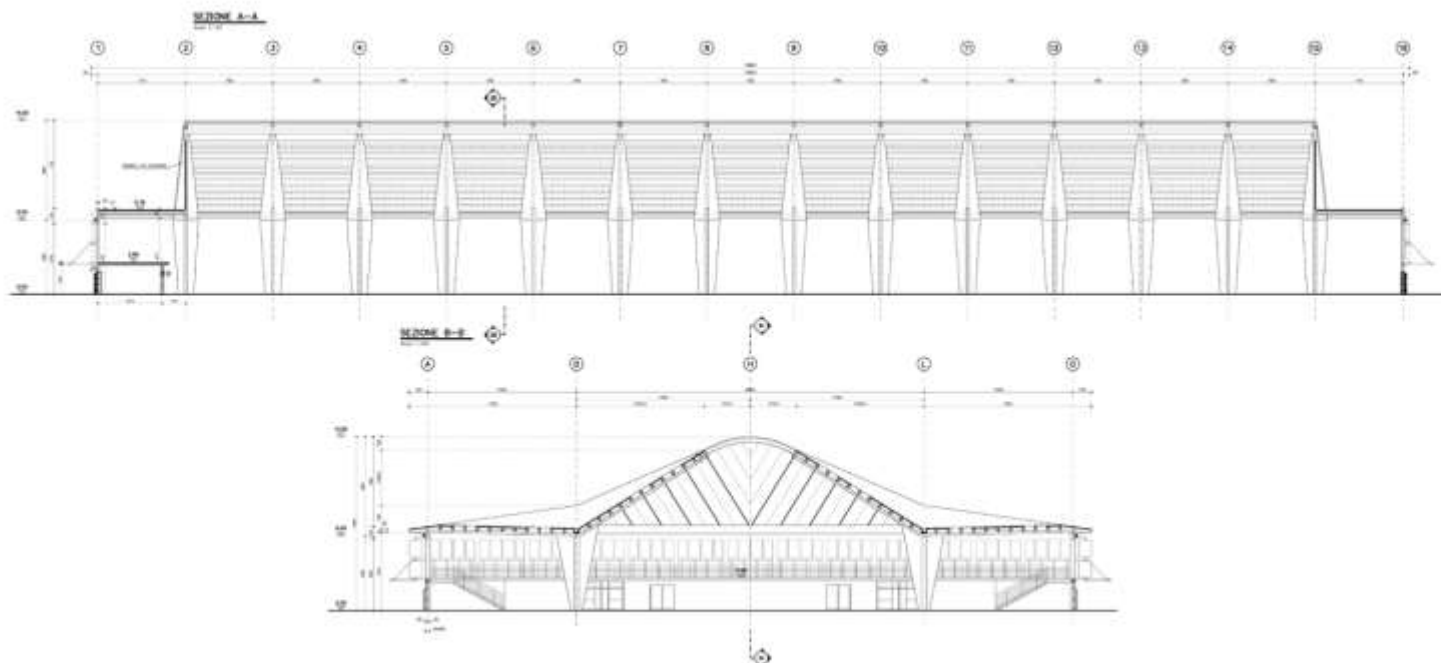

- (a) Fixed at both ends: $l_e = 0.5l$. The column is fixed at both ends, and the effective length is half the actual length.
- (b) Fixed at one end, free at the other: $l_e = 1.0l$. The column is fixed at one end and free at the other, and the effective length is equal to the actual length.
- (c) Free at both ends: $l_e = 2.0l$. The column is free at both ends, and the effective length is twice the actual length.
- (d) Fixed at one end, fixed at the other: $l_e = 0.5l$. The column is fixed at both ends, and the effective length is half the actual length.
